EXPERIENCE

Octanet Services Private Limited

FullStack Developer

May 2024 – Jun 2024

odisha, india

- Contributed to multiple full-stack development projects, enhancing web applications using React.js, Node.js, and other modern technologies.
- Collaborated with cross-functional teams to design, develop, and debug scalable software solutions, gaining hands-on experience in the full software development lifecycle.
- Improved the efficiency of web components and optimized frontend performance by implementing best practices and responsive design techniques.

PROJECTS

Priest Finder and Temple Directory [🔗](#) | [Mern Stack, Firebase](#)

Jun 2024

- Engineered a Priest Finder Web App using Firebase, React.js, JWT, and Node.js, allowing users to find and connect with local priests in Mathura-Vrindavan for religious services.
- Designed and implemented profile management features for priests, including the ability to create, update, and delete profiles, enhancing user engagement and control.
- Integrated feedback mechanisms, temple timing updates, and restaurant listings to provide a comprehensive experience for visitors and locals, boosting usability and service quality.
- [Live site here](#)

E-Learning Web App [🔗](#) | [MERN Stack](#)

Feb 2024

- Built an E-Learning platform using Node.js, React, Google API, and JWT, enabling students to upload and download study materials, including books, notes, and previous year papers.
- Integrated Google Gemini for AI-driven problem-solving, allowing students to ask academic questions and receive instant assistance.
- Designed a user profile section displaying uploaded content and providing account management features, including material deletion and content tracking.
- [Live site here](#)

Hostel Management Website [🔗](#) | [MERN Stack](#)

March 2024

- Developed a comprehensive student section, facilitating seamless complaint registration and effective notice dissemination.
- Designed and implemented a user-friendly warden section for streamlined student record management and efficient notice handling.
- Implemented sophisticated role-based access control mechanisms to ensure stringent data privacy and robust system security.
